

Filter system and limescale protection

**ZFA Quattro Power
for single-family homes**

TRATSON

Is your drinking water really as clean as you think it is?

Water is essential for life, and we use it every day in every room of our homes. But what if it is not as pure as it seems? In many Swiss households, pollutants, heavy metals, drug residues and PFAS can find their way into drinking water unnoticed, despite it looking clear and being officially approved. These substances are mostly invisible but can build up in the body and household over time.

ZFA Quattro Power: filter system and limescale protection combined

The ZFA Quattro Power is a compact central filtration system designed for single-family homes. Its two powerful filter cartridges reliably remove pollutants, heavy metals, medication residues and PFAS. The system is installed directly at the house connection and includes:

- 2 reinforced hoses (150 cm long)
- 1.25" screw connections for easy assembly
- 2 filters connected in series and screwed down

At the same time, the integrated ENK Quattro Power system provides effective protection for your home against limescale, eliminating the need for salt, chemicals or maintenance. Thanks to their sophisticated design, all Tratson limescale protection devices can be seamlessly integrated and adapted to the size of your property. Simply connect. You will enjoy immediate protection in all rooms.

The filter system with the integrated ENK Quattro Power limescale protection system

ZFA-01 Quattro Power | Art. 40.010 | 40 x 40 x 80 cm

ZFA-02 Quattro Power | Art. 40.020 | 40 x 40 x 80 cm

Your advantages at a glance

Removes heavy metals and medication residues

Protects against PFAS
(Teflon, cosmetics, fire
extinguishing foam, etc.)

The best drinking water
for your home

Tratson: your Swiss partner for sustainable limescale protection

Tratson is your Swiss specialist in eco-friendly limescale protection, designed, manufactured and tested in Switzerland. We believe that the best solutions are often the simplest. Our devices are quick to install and easy to use, delivering noticeable results with lasting reliability.

At our headquarters in Birmenstorf, in the heart of Switzerland, we develop, produce and rigorously test each device with the utmost care and technical precision. This is our commitment to quality: genuine reliability, a long service life and Swiss-made products you can trust.

To us, 'SWISS MADE' is more than just a label: it signifies our commitment to authentic Swiss quality and to supporting the Swiss manufacturing industry.

How the ZFA Quattro Power works

1

Filter 1 – KDF/carbon combination filter

Filter 1 combines high-quality activated carbon with the proven KDF technology (Kinetic Degradation Fluxion) – for deep cleaning directly at the house connection.

Removes specifically:

- Chlorine & chloramines (better taste, less odor)
- Pesticide and herbicide residues from agriculture & garden
- Medication residues, hormones and organic impurities
- Heavy metals such as lead, mercury, nickel and cadmium

2

ENK Quattro Power – limescale protection without compromise

Effective limescale protection for the whole house – the ENK Quattro Power system reliably protects against limescale deposits without any salt, chemicals or maintenance, while preserving the natural minerals in the water.

Delivers the following benefits:

- Solves limescale problems sustainably and holistically
- Retains the valuable calcium in the water
- Works without any salt or chemicals
- Extends the service of life of your household appliances

3

Filter 2 – PFAS special filter

Reliable protection against ‘perpetual chemicals’. Filter 2 was specially developed for the retention of PFAS (perfluorinated and polyfluorinated alkyl substances) – synthetic substances that cannot be removed by boiling or conventional filters.

Removes specifically:

- PFAS (e.g. from Teflon, impregnation sprays, cosmetics, extinguishing foam, etc.)
- PFOA, PFOS and other fluorinated compounds
- Poorly degradable industrial chemicals in drinking water

Clean water. A safe home. All thanks to the Tratson ZFA Quattro Power.

By choosing the ZFA Quattro Power and the integrated ENK Quattro Power system, you are opting for a combination of cutting-edge filter technology and sustainable limescale protection. This system has been developed for households that prioritise quality, health and property value.

Choose a solution that reliably protects your entire home from pollutants, heavy metals, medication residues and limescale. Enjoy noticeably cleaner, healthier water from every tap without the need for separate devices everywhere. Safety from basement to roof.

Reliable. Efficient. Sustainable. For truly clean water and the satisfaction of doing things right.

Swiss-made water filters and limescale protection – designed to the highest standards

Tratson stands for genuine Swiss engineering, with products designed and manufactured exclusively in Switzerland. You benefit from durable materials and precise craftsmanship, resulting in a device that will continue to provide reliable protection for many years.

Visible results. Tested safety. Genuine protection for people, the environment and your appliances.

365 days – 100% satisfaction guarantee

Do you worry about pollutants, PFAS and limescale in your water on a daily basis? You shouldn't. Try our filter system with an integrated limescale protection device in your own home for a whole year, risk-free. Enjoy healthy drinking water, free from salt and chemicals, and feel good about it for you and the environment.

**Not applicable outside of Switzerland / Applies to devices installed in Switzerland only.*
